

Repromed staff go to great lengths to personalise your care, but we appreciate that our quality assurance systems may make you feel like one of a large group. We do issue ID cards to protect your privacy and aid in continually ensuring that we have the correct patient. Our team approach may not be obvious to you but we assure you that numerous people are interested in your success.

It has long been recognised that infertility treatment is very stressful. Another integral part of the team is the counsellors. They are available to assist you in all matters relating to the emotional rigours of treatment. Please consider their help in developing coping skills and stress management strategies.

What to
expect

Repromed specialises in assisted reproductive technology (ART) and is highly respected worldwide for its quality of care and innovative procedures.

Unlike other medical treatment, your doctor will be one of a team treating you. Our team of medical specialists, nurses, scientists, counsellors and administration staff will all work together with you to help you fulfil your dream of having children.

Your experience with Repromed may run the following course of treatment:

- 1. INITIAL CONTACT** Our new patient co-ordinators are available free of charge to answer any initial questions you may have before making an appointment with a fertility specialist.
- 2. FIRST VISIT** You can choose from a large number of highly qualified Repromed specialists and GPs trained in fertility treatment to oversee your treatment.
- 3. INFERTILITY TREATMENT** You and your doctor will decide on a treatment option and then you'll be transferred to the nursing team.
- 4. EGG RETRIEVAL ART** requires very precise timing. Repromed specialists are rostered on to perform your egg retrieval and embryo transfer at the precise time to ensure the best chance of success. Your doctor may not perform this procedure on the day but all of our medical staff is extremely well trained and very capable.
- 5. CULTURING EGGS AND SPERM** Not all eggs have the potential to fertilise but every effort will be made to optimise all the components of the laboratory procedures. Repromed staff will keep you informed as to your embryo's progress.
- 6. EMBRYO TRANSFER** The transfer will not require anaesthetic and is similar to a pap smear. The number of embryos transferred is agreed with your doctor but due to the medical risks associated with multiple pregnancy, Repromed encourage single embryo transfer.

If you have excess embryos that are deemed suitable for freezing by the scientific team, these may be frozen and stored for future treatment.
